Profile

Python/Django Developer with over 3 years of hands-on experience designing, developing, and deploying high-performance web applications across fintech, SaaS, and logistics domains. Proven expertise in building scalable RESTful APIs, optimizing relational databases, and implementing security best practices for production systems. Adept at integrating third-party services (payment gateways, messaging APIs, analytics), containerizing applications with Docker, and deploying to AWS, Render, and Heroku. Experienced in Agile environments, collaborating with cross-functional teams, and applying TDD and CI/CD pipelines to ensure maintainable and reliable code. Strong problem-solver who thrives in fast-paced environments, with demonstrated ability to deliver end-to-end solutions—from architecture and database design to frontend integration and cloud deployment.

Technical Skills

Languages: Python, JavaScript, Java

Frameworks: Django, Django REST Framework, Flask, FastAPI, React.js

Databases: PostgreSQL, MySQL, SQLite

Tools & Platforms: Git, Docker, Redis, Celery, Cloudinary, AWS, Heroku, Render

Practices: Test-Driven Development (TDD), CI/CD, REST API Design, Authentication & Security

Professional Experience

Python Developer – Bincom Dev Center, Lagos (Apprentice) | May 2024 – Present

- Designed and implemented Django-based applications with secure authentication and REST APIs.
- Applied data science libraries (Pandas, NumPy, Scikit-learn) to prototype analytics and predictive features.

Python Developer Intern – Prodigy InfoTech, Mumbai | Apr 2024 – May 2024

- Developed Python-based GUI applications, including a Temperature Converter and Contact Management System.
- Improved application usability and optimized performance for end-users.

Student Software Engineer – Power Learn Project, Kenya | Feb 2024 – Jul 2024

- Built and deployed Django projects, strengthening backend architecture and database design skills.
- Collaborated with peers to deliver functional applications in an Agile learning environment.

Projects

E-commerce Web Application

- Built a full-stack e-commerce platform enabling users to browse, add to cart, and securely checkout using integrated payment gateways (Paystack/Stripe).
- Implemented email-based authentication, password reset, and role-based access control (admin/customers).
- Designed normalized PostgreSQL schema, achieving 30% faster query response times through indexing and optimization.
- Integrated Celery with Redis for order notifications and automated email receipts.
- Deployed to Render with environment-specific configurations and managed product images via Cloudinary.

Logistics Management System

- Developed a logistics and shipment management application for tracking orders, drivers, and delivery routes.
- Integrated Google Maps APIs for live location tracking and optimized route assignments.
- Designed an admin dashboard for operational efficiency and automated email alerts for shipment updates.
- Result: streamlined order tracking and improved customer communication across devices.

Email Automation Tool

- Built a scalable email system capable of sending thousands of emails with attachments securely via SMTP.
- Reduced manual email workflows by 80%, enabling faster communication for small businesses.
- Added user-friendly bulk upload interface for multiple recipients with validation checks.

Social Media Platform

- Designed and deployed a mini social network with secure authentication, profile management, and real-time post interactions (likes, shares).
- Optimized frontend with Tailwind CSS for responsive user experience.
- Architected backend using Django ORM with SQLite and later migrated to PostgreSQL for scalability.

Trip Booking Management System

- Built a travel organization platform ("Expense Voyage") with account management, trip scheduling, pricing, and ticket notifications.
- Integrated review system, direct support contact, and an admin approval workflow.
- Implemented notification emails for trip updates and bookings, including digital flight tickets.

Education

Aptech, Lagos – Advanced Diploma in Software Engineering (2023 – *Present*)

NIIT, Lagos – Python Programming Certificate (2022 – 2023)
